

**AMENDMENTS TO THE CLAIMS:**

1. (Original) A rotor for a permanent magnet type motor, comprising:  
a rotor yoke;  
a permanent magnet connected on a surface of the rotor yoke; and  
a metal film which is disposed between the rotor yoke and the permanent magnet,  
wherein the rotor yoke and the permanent magnet are subjected to beam welding.
2. (Original) The rotor for a permanent magnet type motor according to claim 1, wherein the metal film is formed on a surface of the permanent magnet.
3. (Previously Presented) The rotor for a permanent magnet type motor according to claim 1, wherein the metal film has a thickness of 25 to 90  $\mu\text{m}$ .
4. (Previously Presented) The rotor for a permanent magnet type motor according to claim 1, wherein the metal film contains at least one of nickel and copper.
5. (Original) The rotor for a permanent magnet type motor according to claim 4,

wherein the metal film has a copper film composed of copper and a nickel film composed of nickel.

6. (Currently Amended) The rotor for a permanent magnet type motor according to ~~claim 4~~ claim 1, wherein the rotor yoke has a stacked structure.
